

NIKHIL SHINGADE

ARTIFICIAL INTELLIGENCE ENGINEER

nikhilshingade299@gmail.com | +91 928-455-2295 | [LinkedIn] | [GitHub]

OBJECTIVE

Motivated and detail-oriented Artificial Intelligence student with a strong foundation in Python, machine learning, and data analysis. Skilled in developing data-driven solutions and working with real-world datasets to extract meaningful insights. A quick learner with strong problem-solving abilities, seeking an opportunity to apply technical skills in a dynamic environment while continuously enhancing knowledge in AI and data science.

EDUCATION

- | | |
|---|--|
| • Vidyavaridhi's College Of Engineering And Technology Vasai
<i>BE - Artificial Intelligence & Data Science</i> | <i>July 2023-May 2027</i>
CGPA- 8.07 |
| • Shankerrao Mohite Mahavidhyalaya Akluj
<i>HSC - Maharashtra State Board</i> | <i>June 2021 - Feb 2023</i>
Percentage -65% |
| • Shree Kalbhairvanath Vidhyalya Medad
<i>SSC - Maharashtra State Board</i> | <i>June 2020 - Feb 2021</i>
Percentage - 86.49% |

SKILLS

- **Programming Languages:** Python, C++, Java-Script, Java (Basic)
- **AI & Machine Learning:** Machine Learning, CNN, Decision Trees, SVM, Random Forest
- **Data Science & Analytics:** Data Analysis, Data Preprocessing, Feature Engineering, Data Visualization
- **Frameworks & Libraries:** Scikit-learn, Pandas, NumPy, OpenCV, Flask, Streamlit, Plotly, Matplotlib
- **Web Technologies:** HTML, CSS, Bootstrap, JavaScript
- **Databases:** SQL, MySQL

EXPERIENCE

Unified Mentor Pvt. Ltd. <i>Machine Learning Intern</i>	<i>March 2026 - June 2026</i> Remote
---	---

- Built and trained machine learning models using real-world datasets for predictive analysis.
- Performed data preprocessing, model development, and evaluation to improve prediction performance.
- Developed an interactive analytics dashboard using Python, Streamlit, and Plotly to analyze system capacity and care-load trends.

DGrowth Digital & Total Solutions Pvt.Ltd. <i>Artificial Intelligence Intern</i>	<i>June 2026 - Sep 2026</i> On-Site
--	--

- Assisted in the development and implementation of AI and Machine Learning solutions.
- Performed data collection, cleaning, preprocessing, and analysis for AI model development.
- Gained hands-on experience in Python, Machine Learning, Generative AI, LLMs, and Prompt Engineering.
- Worked on AI-powered application development, API integration, automation, and model evaluation.

PROJECTS

RiskShield AI – Supply Chain Risk Prediction & Early Warning System	<i>GitHub</i>
--	---------------

Python | Scikit-learn | XGBoost | SHAP | FastAPI | MySQL | React | Weather API

- Developed an ML-based system to predict shipment delays and supply chain disruptions.
- Integrated shipment, supplier, route, and weather data for risk assessment.
- Implemented risk scoring, explainable AI, early warnings, and actionable recommendations.

UAC Care Load Analytics Dashboard	<i>GitHub</i>
--	---------------

Python | Pandas | Streamlit | Plotly | Linear Regression

- Built an interactive dashboard to analyze system capacity and care-load trends.
- Developed key performance metrics for monitoring system load and operational patterns.
- Applied Linear Regression to forecast future system load.

Hospital Management System (HMS)	<i>GitHub</i>
---	---------------

Python | Flask | MySQL | HTML | CSS | JavaScript

- Developed a web-based system to streamline hospital operations and patient management.
- Implemented patient registration, doctor scheduling, and diagnostic lab report management.
- Designed role-based access for patients, doctors, and administrators.
